Aġenzija Żgħażaġħ will endorse the ranking list and issue the list of projects being granted funding based on the ranking order and the budget available.

The acceptance of an application does not necessarily constitute an undertaking to award funding equal to the amount request by the applicant (this funding could be reduced).

A meeting with beneficiaries will be held to clearly explain all obligations and financial procedures to be followed during the implementation phase of the project.

- iv. In order to be considered as eligible quotations, the following procedure must be followed and the below listed information must be clearly specified:
 - a) Date of issue of quotation must be within the project activity period
 - b) Quotations must be sent on the same day, bearing the same submission deadline. If hand quotations are sought, these must be collected in a time frame of two consecutive weeks.
 - c) Same product description must be written on the request for quotation, otherwise the beneficiary will not be able to compare the submissions received and communicate the decision why the best offer was chosen from the submissions received. A justification explaining the reason why the selected quotation was chosen should be included in each comparative sheet analysis. In the eventuality that there is a price discrepancy between the approved and awarded quotation and the invoice received, the beneficiary is requested to write a justifiable reason; otherwise the cheaper amount will be reimbursed.
 - d) Request for quote must include the specifications of the purchase but not a specific brand. Request for quote indicating a particular brand will be deemed as ineligible.
 - e) For all ICT related hardware, the request for quotations should be issued with the same product specifications to all bidders. For example in case of PCs and Laptops, quotations must be issued for: specific processor type, ram size, storage size and type, display type, resolution and size so that a head-to-head comparison could be made. Failure to comply the cost will be considered as ineligible. If the beneficiary opts to get online quotations, a check list needs to

be included with the comparative sheet analysis, verifying that the same product specifications have been requested. Same procedure applies to all other technical equipment.

- f) All quotations, both local and foreign must have the date of quote submission. In the absence of such, the quotation will be considered as invalid.
- g) A comparative sheet analysis of all quote submissions received must be attached with each purchase exceeding the direct order limit i.e. €250.00 VAT exclusive.
- h) In the eventuality that quotations are sent to foreign suppliers and the later informs that they do not ship to Malta, the quotation will be considered as invalid and hence, its replacement must be sought.
- i) An invoice of the purchase and a fiscal receipt is to be included with the quotation and comparative sheet analysis.

Aġenzija Żgħażaġh reserves the right to disqualify quotations and hence retain funds, if the beneficiary does not provide satisfactory selective reasons.

14. Audits and Monitoring

Projects granted through the BeActive scheme may be monitored on site or through desk checks by Aġenzija Żgħażaġh at any time during the term of the grant agreement. All to-date project documentation is to be presented including evidence of project activities, participation of young people in these activities and financial documentation. Aġenzija Żgħażaġh reserves the right to request evidence of items procured through this scheme for up to three years following the grant agreement.

15. Data Protection

All personal data contained in the application forms and grant agreements shall be processed in accordance with the Aġenzija Żgħażaġh Data Protection Privacy Policy which is available on the Aġenzija Żgħażaġh website <https://youth.gov.mt>

Below you may find further tips which may help you develop a good project:

- i. A project needs to be clear in its rationale, clearly describing the youth initiative being proposed and identifying how, and through which means, it will create impact on the chosen theme/s. A BeActive project is developed by and with young people and involves young people throughout its course.
- ii. The project design should be linked to the objectives of the project, to the project outcomes and it should be clearly defined, realistic and balanced. The project design should follow the logistic of the proposed project and detail information regarding preparatory activities, the project activities and marketing activities.
- iii. To create impact is to have a strong effect on something or someone. A good project

has clear and reachable goals for immediate impact of the project, and also a longer term plan for the impact it leaves on the immediate and wider community.

- iv. Project visibility is a key ingredient to successful projects. Project visibility refers to ensuring everyone involved is aware of the aim and objectives of the project and of a series of measures set in place to ensure that the project is communicated to the wider community. Hence, the application should outline the initiatives which the beneficiary will be using to raise awareness of the project. These may include information packs, promotional items, inviting journalists to observe, issuing press releases, social networking activities (online and offline). Project visibility for Aġenzija Żgħażaġh funded projects should include clear promotional value for youth participation in general. The compulsory use of the official Aġenzija Żgħażaġh logo and a statement outlining the support being granted by Aġenzija Żgħażaġh through the BeActive scheme should be included in all of the project material used for communication purposes.
- v. The application should be entirely filled in and be submitted with all the requested annexes.

These guidelines have been updated on the 27th September 2021.
